Oklahoma Planted Acreage Down 6 Percent from Last Year

Oklahoma:

Total planted acreage for major crops in Oklahoma is down 6 percent from last year, according to the Oklahoma Field Office of USDA-NASS. Cotton, sorghum, soybeans, peanuts and canola show an increase in planted acreage while wheat, oats, rye, corn, and sunflowers show a decline.

Wheat planted acres are estimated at 5.2 million acres, down 9 percent from 2009. Acres harvested for grain, at 3.9 million, are up 11 percent from last year.

Oats planted acreage is estimated at 40,000 acres, down 20 percent from last year. Acres harvested for grain are forecast at 9,000, down 40 percent from 2009.

Rye plantings are estimated at 250,000 acres, down 7 percent from 2009. Harvested acres, at 55,000, are 38 percent above last year.

Cotton planted acreage is forecast at 210,000 acres, up 2 percent from last year. The first harvested acreage forecast of the year will be issued on August 12, 2010.

Corn planted acres are forecast at 370,000 acres, down 5 percent from 2009. Acres for grain, at 320,000, are unchanged from last year.

Sorghum planted acres are forecast at 260,000 acres, up 4 percent from 2009. Acres for grain, at 220,000, are unchanged from last year.

Soybean planted acreage is forecast at 480,000 acres, an increase of 19 percent from 2009. This acreage ties the record set in 1999. Harvested acres are expected to total 440,000 acres, 13 percent above last year. If realized, this would be a record for harvested acres in Oklahoma.

Peanut planted acreage is forecast at 16,000, 14 percent above last year. Harvested acres are expected to total 15,000, up 15 percent from last year.

All hay acreage is forecast at 3.02 million, down 6 percent from 2009. **Alfalfa hay**, at 320,000 acres, is unchanged from last year.

All other hay is forecast at 2.7 million acres, down 7 percent from last year.

Survey results are based on Oklahoma farmers' and ranchers' reports from the June Agricultural Survey conducted during the first two weeks of June 2010.

United States Wheat Acreage Down 8 Percent

United States:

All **wheat** planted area is estimated at 54.3 million acres, the lowest since 1971, and harvested area at 48.3 million acres. The planted total is down 8 percent from 2009.

Corn planted for all purposes is estimated at 87.9 million acres, up 2 percent from 2009. Growers expect to harvest 81.0 million acres for grain, up 2 percent from last year.

Area planted to **sorghum** for all purposes is estimated at 6.0 million acres. The 2010 acreage is down 10 percent from last year. Acreage expected for grain harvest, at 5.18 million, is down 6 percent from last year.

The **soybean** planted area is estimated at 78.9 million acres, up 2 percent from last year and is the largest U.S. planted acreage on record. Area for harvest is estimated at 78.0 million acres, up 2 percent from 2009, and will also be the largest on record, if realized.

Acreage planted to **peanuts** in 2010 is estimated at 1.29 million acres, up 16 percent from 2009. Area for harvest is estimated at 1.26 million acres, compared with the 1.08 million harvested last year.

All **cotton** plantings for 2010 are expected to total 10.9 million acres, 19 percent above last year.

The area seeded to **oats** for the 2010 crop year totaled 3.18 million acres, down 7 percent from the previous year and is the lowest on record. Growers expect to harvest 1.32 million acres for grain, down 5 percent from 2009.

Barley growers seeded 2.97 million acres for 2010, down 17 percent a year ago. This is the lowest barley seeded acreage on record, well below the previous record low of 3.45 million acres established in 2006. Harvested acreage is estimated at 2.55 million acres, down 18 percent from 2009, and if realized, will be the lowest since 1883.

The area planted to **rye** is estimated at 1.19 million acres, down 4 percent from 2009. Harvested area is expected to total 250,000 acres, down 1 percent from last year.

Producers expect to harvest 59.7 million acres of **all hay** in 2010, down slightly from 2009. **Alfalfa and alfalfa mixtures** are expected to total 20.7 million acres, down 2 percent from last year. Expected area for harvest for **all other** types of hay totals 38.9 million acres, up 1 percent from 2009.
